MODULARIS ACCELERATED CONSULTING SERVICES

Accelerating Confidence

1 CONFIDENCE TO GET THE JOB DONE. FAST.

- Accelerate your software development lifecycle now. Be confident by significantly reducing the time and effort required to ensure positive impact on your business.

- With Modularis confidence is built upon our deep understanding of critical business drivers and 10-year experience creating successful commercial enterprise software applications. Our U.S.-based consultants accelerate the achievement of business solutions by:

- Driving efficiency and predictability into your software development process.
- Extracting maximum value from your staff and IT investments.
- Enabling you to thrive in increasingly complex business and technology environments.
- Ensuring a rapid return on investment while helping your team deliver projects faster.

Actively reducing risk, time and cost without going offshore.

2 ACCELERATE MIGRATION TO .NET & THE CLOUD

- Modularis Accelerated Consulting Services is a uniquely different business technology-consulting firm. Only our professionals are equipped with the field-proven Modularis Accelerator Enterprise Application Platform.

- We work with clients to expedite the migration of legacy applications to Rich Internet Applications (RIA) deployed to The Cloud or your own data centers.

- Modularis can help to transform your business by:

- Automating up to 70% of your software development process
- Easily integrating with and adding to your existing software investments
- Helping you deliver desired business solutions based on a proven and scalable Service-Oriented Architecture (SOA)
- Building a cloud-optimized software infrastructure that enables new business models and revenue streams

- Only Modularis clients realize the exclusive benefits enabled by the Accelerator Enterprise Application Platform.

3 A PLATFORM IN WHICH YOU CAN BELIEVE

- Since 1999, every business software solution Modularis has created with our clients is robust, secure, scalable, flexible, and incredibly future-proof.

- Built upon Microsoft .NET, the Accelerator Platform is a model-driven automation engine designed to help you achieve long-term, enterprise-growth strategies, while being agile enough to respond to short-term needs dictated by business or market conditions.

- The Accelerator Platform's proven and extensible end-to-end Service Oriented Architecture:

- Is ideal for building commercial-grade Rich Internet Applications
- Is optimized for the Cloud Computing
- Permits your engineers to focus on business logic and user experience development rather than repetitive and costly infrastructure development.
- Results in consistently fewer defects; Accelerator eliminates up to 70% of hand-written code.
- Maximizes the benefits of Agile development.
- Enables you to safely and easily make model and design changes at any point in the development lifecycle.
- Enforces consistent industry standards and Microsoft-proven best practices.

Accelerating Confidence

4 RARE SERVICE ORIENTED ARCHITECTURE EXPERTISE

- Modularis is further differentiated by our deep expertise in Service Oriented Architecture. Equipped with the Accelerator Platform, our U.S.-based team provides clients with an extremely high level of efficiency within each solution created. The benefits of our unique approach include:
 - Delivery of business solutions on time and on budget.
 - Multi-business solutions that can be extended, modified and enhanced with ease.
 - Efficiency, predictability and confidence.
 - Investment payoff realized much faster and over an extended time period.

5 MICROSOFT CENTERED

- Modularis is a Microsoft Gold-Certified Partner and has earned the ISV Competency for its ability to design, develop, sell, and support enterprise software systems.

“Modularis has been helping clients leverage the latest Microsoft technologies to build commercial-grade software systems for more than ten years. Microsoft is fully committed to Modularis’ efforts to help clients excel in today’s challenging business environments.”

Bob Laskey, General Manager, Developer & Platform Evangelism, U.S. Central Region, Microsoft Corporation

6 EFFECTIVENESS ACCELERATED

- We are measured by how we create business value for our clients. Value means lower time-related costs, accelerated speed to completion of software development projects, rapid ROI, high initial quality, significantly reduced risk, and enhanced competitive advantage.

SOLUTION PROFILE: Feed Management Systems

- Feed Management Systems® executives partnered with Modularis to build a new business applications platform for developing dynamic recipe-based vertical solutions.

“One of our current systems is written for one vertical market and limits us to North America. The Modularis Accelerator Enterprise Application Platform permits us to grow into other global markets and allows us to build a platform to leverage our intellectual property into additional related verticals as well. We build applications with the Modularis Platform and our clients can further extend their own deployments.”

Rich Reynertson, CEO
Feed Manufacturing Systems

- Our ability to effectively handle the most ambitious and complex projects truly sets us apart.

SOLUTION PROFILE: Pennsylvania Office of Attorney General

- The Pennsylvania Attorney General ordered the creation of a highly efficient criminal investigation and evidence management system for use state-wide by the OAG’s Criminal Division agents, lawyers and administrators.

“Throughout the course of building our new investigation management system, Modularis was able to leverage its Accelerator Enterprise Application Platform to incorporate complex business requirements and deliver system enhancements in a significantly expedited time frame. Furthermore, these enhancements could be enabled without having to completely rebuild or overhaul the application from the ground up. This will benefit us greatly as new mandates and requirements are identified going forward.”

George White, Chief Information Officer,
Pennsylvania Office of Attorney General

IS MODULARIS ACCELERATED CONSULTING SERVICES RIGHT FOR ME?

- I need to build or migrate an important software application to Microsoft .NET.
- I need a trusted technology partner who can help me take full advantage of Cloud Computing using the latest Microsoft technologies
- I need to extract maximum value from my staff and IT investments.
- I need to thrive in increasingly complex business and technology environments.
- I need to actively reduce risk and billable hours without going offshore.
- I need to achieve ROI in months, not years.
- I need to do it now.

If the answer to any of these questions is yes, contact us to schedule a no risk, introductory meeting
